Aspöck Systems

Aspöck Systems – we bring light to the road

At Aspöck Systems we have made our business design, development and build the best possible solutions for European vehicle manufacturers. And we are now the complete range of vehicles.

Individual systems – Satisfied customers. Since their inception in 1977, Aspöck Systems GmbH has focused on a philosophy that has made it one of today's leading producers of lighting systems for the vehicle industry, developing standardized solutions for each individual customer. This flexibility has become the successful trademark of Aspöck Systems.

Innovative products. We see it as our obligation to make our entire range of cable and light systems compatible with the state-of-the-art, and play a pioneering role in setting new standards. We apply waterproof cables, connection systems and LED lighting to every field of application.

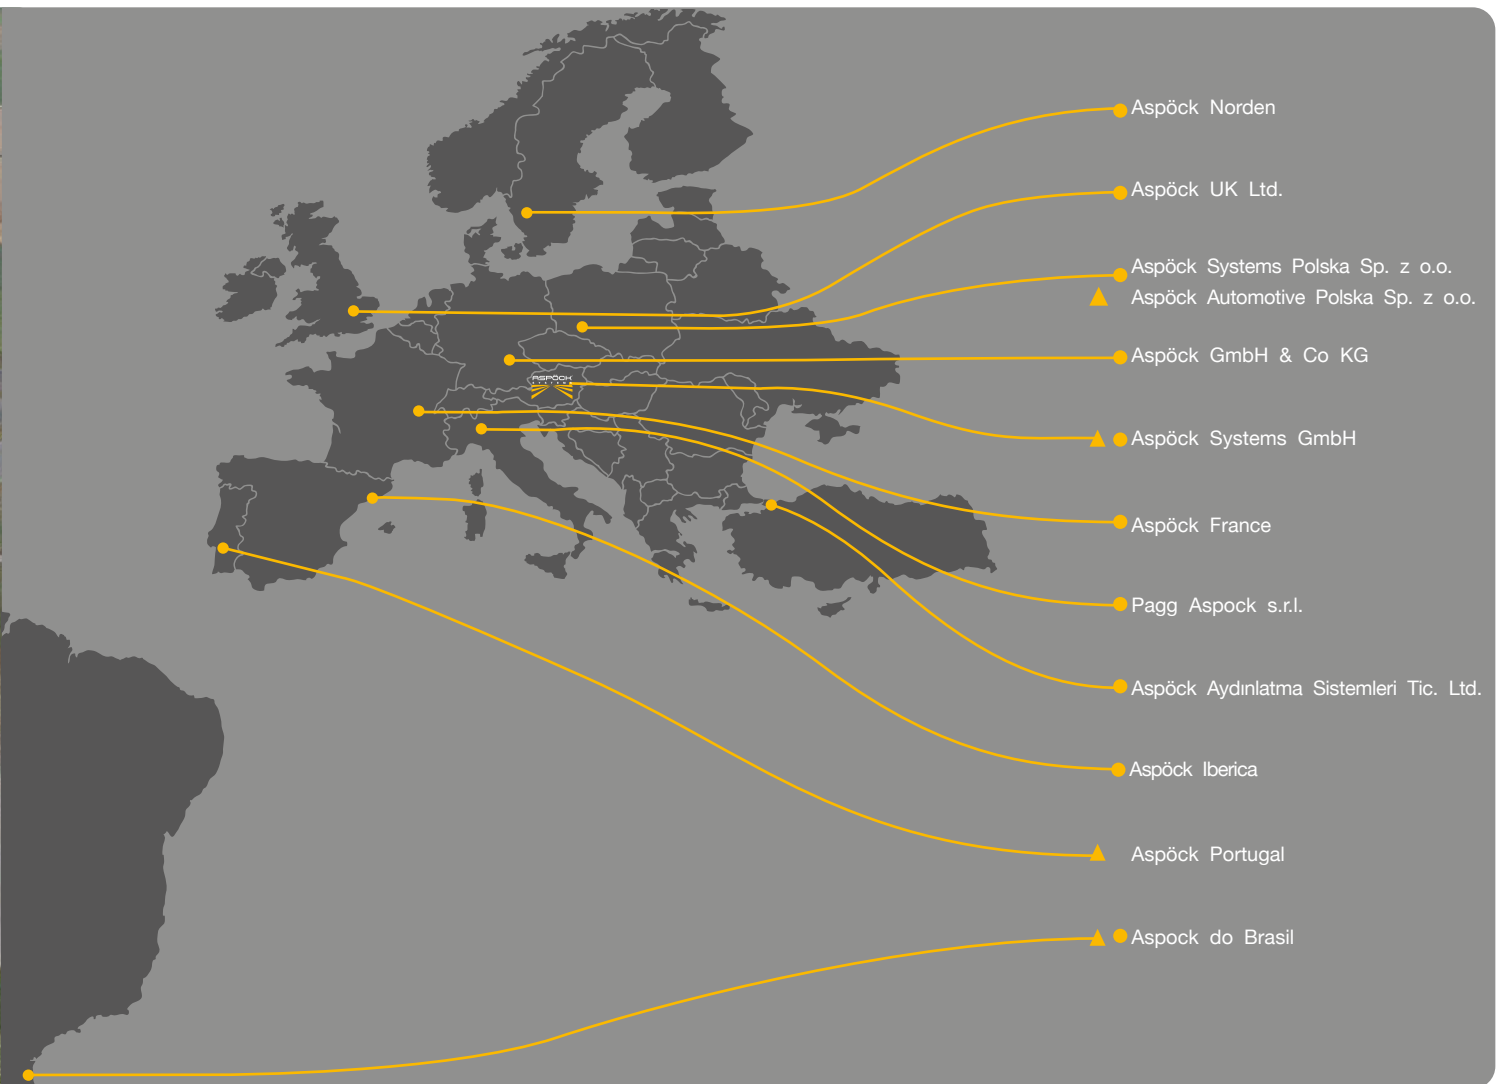

Continuous growth. Our headquarters in Peuerbach, Upper Austria has undergone continuous expansion in the production, storage and management sectors. Every year we invest in new production facilities, testing equipment and development systems to remain at the cutting edge of technology. At the same time we promote the further education and training of our employees, so that they always have the right answer when confronted with difficult questions, such as specific legislation issues.

Aspöck Systems GmbH

Subsidiaries.

A perfectly organised sales and service network throughout Europe guarantees best delivery times and a high degree of technical expertise. Many of the sales and production sites are our own subsidiaries, those of sales partners.

Milestones

'77

Aspöck company founded as manufacturer of lighting systems for agricultural vehicles.

'81

First production workshop opens in Peuerbach

'82

First Aspöck connector system developed;
new customers: car trailer manufacturers

'88

Formation of Aspöck Germany

'91

New customers: caravan manufacturers

'92

New customers: truck trailer manufacturers

New customers: car manufacturers

'06

Formation of Aspöck Norden

New customers: truck manufacturers

Renaming Fabrilcar as Aspöck Portugal

'08

New customers: motorcycle manufacturers

Take-over Fabrilcar

Extension of the manufacturing base location: Portugal

'11

Implementing of the fully automated high rack ware-house in Peuerbach

Formation of Aspöck Poland

'05

'07

'09

'12

'96

First Aspöck
„Multipoint“ light
produced

'97

New customers:
bicycle carrier rack
manufacturers

'99

Gründung
Aspöck Iberica
Gründung
Trailer Lite

'01

Formation of
Aspöck Iberica and
Formation of
Trailer Lite

'03

Partnership
PAGG Aspöck

'04

Introduce
moulding
technology to
connector systems

„Europoint III“
The first lamp with
a „Light Guide“ for
trailers

Formation of
Aspöck Turkey

'13

Opening of new
manufacturing base
location: Poland

'16

Extension of the
manufacturing base
location: Portugal

'15

New building for loca-
tion: Peuerbach

New tail light:
ECOLED II

LumEU powered by
Aspöck - LED-Stripes

'18

New building
for office and
logistics
location: France

'17

Extension of the
manufacturing base
Location: Automotive
Polen

'19

Aspöck cable systems

Aspöck connector systems

Aspöck cable systems consists of 2-, 3-, 7- and 17-pin connectors and sockets. Each cable system is available to match every 24 V trailer. Aspöck connector systems enable all components to be connected up easily. All plug/socket units are moulded and approved to protection class IP69K (waterproof against spray water and when submerged in water).

2-pin ASS1 plug

The 2-pin ASS1 plug and socket housing enable connections to be made quickly for systems such as: position lights, side lights and outline lights as well as additional functions requiring a 2-pin connection.

3-pin ASS3 plug

Thanks to its small diameter, the 3-pin ASS3 plug offers speed and flexibility during installation. The ASS3 can also be used for 3-pin additional functions.

2-pin ASS2 plug

The 2-pin ASS2 plug is a further development of the 2-pin ASS1 plug – the advantage is an additional bayonet connection. This system enables connections to be made quickly and reliably for systems such as: position lights, side lights and outline lights as well as additional functions requiring a 2-pin connection.

7-pin ASS2 plug

Aspöck rear lights are linked to the Aspöck connection system using this 7-pin plug. The 7-pin plug and moulded housing can also be used for other additional functions.

17-pin ASS3 plug

The 17-pin plug and moulded housing are used to connect front-end power supply, main cable and rear cable system as well as linking up to an additional distributor.

Press & Ready System (P&R)

The P&R cable system offers an additional method of establishing contacts quickly and easily for vehicle installations. All Aspöck single-function lights can be equipped and connected using the P&R System. The cables can be supplied in different lengths to match each application. These lights can be mounted at any point on a 2-core flat cable and have already been function tested. Because each individual conductor features a silicon seal, the system is completely waterproof and can even be used for hazard goods transport applications (ADR).

Connector Service Set

Aspöck 2-, 3-, 7- and 17-pin service and spares sets are available for integrating customer-specific lights or assemblies into the Aspöck connection system and retrofitting Aspöck components.

24V Lamps

* ECOLED II

WITH 7 PIN ASS2 CONNECTION

GENERAL DESCRIPTION

- LED Rear Lamp with replaceable lens.
- Spare lens can be used on both sides.
- Reduction in the variety of spare parts: By simply rotating the lens, the Rear Lamp can be adjusted to the mounting position (LH / RH).
- Innovative Glowing Body Technology as Tail Light.
- Increased visibility due to large luminous area of the Tail & Stop Light functions.
- Progressive Direction Indicator.
- ISO pulse 13207-1 as standard (for 24 V).
- Practical click system facilitates the mounting of the lens.
- Chemical and scratch-resistant lens.
- SMCG (Sidemarker Control Gear) included (for version with 2-pin outputs) according to ECE 48, Rev. 6.
- Intelligent partial deactivation of the Stop Light when the rear fog light is activated.
- LED End Outline Marker is mounted with a mounting bracket which has a predetermined breaking point.
- Optional with 4 x 2-pin connections on the rear of the lamp (distributor function).
- Individual LED modules are IP6K9K tested.

* MULTILED

WITH 7 PIN ASS2 MALE CONNECTOR

GENERAL DESCRIPTION

- With all functions in LED (reversing light, stop light, direction indicator and fog light).
- Integrated electronics for power control and trailer identification.
- With or without side marker lamps in led.
- With or without triangle.
- With or without 2 pin ASS2 connection.

DESCRIPTION

- MultiLED with triangle left, with SML, with LCG
- MultiLED with triangle right, with SML, with LCG
- MultiLED with triangle left, 2 x 2 pin ASS2 connection, with SML, with LCG
- MultiLED with triangle right, 2 x 2 pin ASS2 connection, with SML, with LCG

WORKING LAMP LED

WORKPOINT LED 650

GENERAL DESCRIPTION

- long life expectancy
- very low current consumption
- water and steam resistant
- standard mounting
- all purpose (near field lighting and spot lighting)
- overheating protection
- ~650 lumen

DESCRIPTION

2,5 m open end
2,5 m ASS2

PART NO

39-6400-017
39-6407-007

WORKPOINT LED 800

GENERAL DESCRIPTION

- long life expectancy
- very low current consumption
- water and steam resistant
- standard mounting
- all purpose (near field lighting and spot lighting)
- overheating protection
- ~800 lumen

DESCRIPTION

2,5 m open end
2,5 m ASS2

PART NO

39-6800-017
39-6807-007

WORKING LAMP LED

WORKPOINT LED 3000

GENERAL DESCRIPTION

- long life expectancy
- high light output
- very low current consumption
- temperatur range of -40 °C ~ 80 °C
- steam and water resistant
- standard mounting
- die-cast aluminium for maximum heat dissipation
- ~3000 lumen

DESCRIPTION

1.5 m open end cable,
spot beam (20°)

1.5 m open end cable, flood
beam (60°)

38-8221-107

WORKING LAMP LED / REVERSE LAMP LED

WORKPOINT LED 1500

GENERAL DESCRIPTION

- admitted to the reversing light
- long life expectancy
- high light output
- very low current consumption
- temperatur range of -40 °C ~ 80 °C
- steam and water resistant
- standard mounting
- die-cast aluminium for maximum heat dissipation
- ~1500 lumen

DESCRIPTION

1.5 m open end cable

PART NO

38-8220-007

WORKING LIGHT - REVERSING LIGHT

21 W

GENERAL DESCRIPTION

- According to the new guidelines it is able to be mounted as working light as well as reversing light.
- Large high light output in spite of compact dimensions
- Swinging socket.
- In 21W version and 70W version available.

DESCRIPTION

- 21W with 1,5 m ASS2
- 21W with 2,5 m ASS2
- 21W with 2,5 m open end

PART NO

- 38-9007-007
- 38-9007-017
- 38-9000-007

70 W

DESCRIPTION

- 70W H3 with 1,5 m ASS2
- 70W H3 with 2,5 m ASS2
- 70W H3 with 2,5 m open end

PART NO

- 38-9107-007

SPARE PARTS AND ACCESSORIES

DESCRIPTION

- reverse 70 W - as spare part incl. 24V 70W H3 lamp

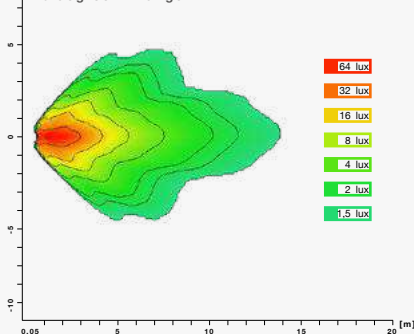

PART NO

- 28-9100-007

REVERSING LAMP LED OVAL

10 grad Neigungswinkel
10 degree tilt angle

GENERAL DESCRIPTION

- very low current consumption
- temperature range from -40°C to +80°C
- water and steam resistant
- maintenance free and long life expectancy (approx. 20,000 hours) due to LED technology
- dual voltage 12V / 24V
- high gloss reflector
- light emission 150 x 82 mm
- permitted according to ECE48/ADR
- 200 lumen

DESCRIPTION

- 2,5 m open end
- 2,5 m with 2 pin ASS2

PART NO

- 38-8200-007
- 38-8207-007

24V LAMPS INTERIOR LAMP

INPOINT III LED

LED INTERIOR LAMP

GENERAL DESCRIPTION

- long life expectancy
- high light output
- very low current consumption
- lens in frosted optic
- standard mounting
- dual voltage
- optional with switch, or motion sensor (PIR Sensor)

DESCRIPTION

interior lamp LED short, 0.3 m cable open end

interior lamp LED short, with switch, 0.3 m cable open end

interior lamp LED short, with motion sensor, 0.3 m cable open end

interior lamp LED long, 0.3 m cable open end

24V Junction Boxes

24V JUNCTION BOXES SOCKET JUNCTION BOX

SOCKET JUNCTION BOX

3-SOCKET JUNCTION BOX

GENERAL DESCRIPTION

- Pre-assembled multifunction housing
 - 1) socket ISO 1185
 - 2) socket ISO 3731
 - 3) socket ISO 12098
- Interchangeable housings in bayonet version ISO 1185, 3731, and 12098.
- 5 pins (cable glands or 2 pin ASS2 connection)
- Not ADR tested.

DESCRIPTION

0,6 m 17 pin ASS3 connector
0,6 m 15 pin bayonet connector

PART NO

76-7037-007
76-7002-007

Important notice regarding the 3-socket junction box:

Caution: ADR vehicles (Carriage of Dangerous Goods) may only use the 15 pin connector (ISO 12098)! Do not use the other available sockets! There is danger of fire and explosion and danger to life!

This would be the way to make the 3-socket junction box suitable for an ADR Zone 2 usage:

To use the 3-socket junction box for ADR, please fit the safety caps into the ISO 1185 and ISO 3731 sockets.

2 pc. safety caps for ISO 1185 and ISO 3731 sockets

24V Rear Bumper

24V REAR BUMPER

ASPÖCK ALUMINIUM REAR BUMPER

GENERAL DESCRIPTION

- Types: 2,4 m anodized or white, pre-drilled for all necessary Aspöck lights and junction boxes:
- Net weight without wiring or surface mounting parts about 17 kg.
- "E" approved.

DESCRIPTION

loose anodised, only drilled including protection caps

anodised with: Europoint II, Superpoint II and rear supply cable

anodised with: Europoint II (with 1 x tail light in LED), Superpoint II and junction box

anodised with: Europoint II, Superpoint III LED, number plate light (LED version) and junction box

anodised with: Europoint III standard, Superpoint IV LED, number plate light (bulb version), and junction box

anodised with: Europoint III LED, Superpoint IV & LCG for direction indicator incl. number plate light (LED), and junction box

24V Electronics Accessories

24V ELECTRONIC ACCESSORIES

GENERAL ADVICE!

Led lighting draws less current than incandescent lamps.

This is known to cause problems with certain vehicle bulb failure monitoring systems, across all manufacturers.

The low power consumption of led lamps can lead to a visual error message to the driver.

As monitoring of the direction indicator is a mandatory requirement, we recommend Aspöck LED lamps are always used in conjunction with our Led Control Gear „LCG“. Aspöck cannot accept any liability for incompatibility of the „LCG“ with the non-mandatory functions, these are provided for driver convenience. With the variation of vehicle types available it is impossible for Aspöck to verify every combination.

It is the driver of the vehicles legal responsibility to check whether all lighting is operating correctly.

It must also be noted that the maximum current for each function is 3A. Please take care if connecting a vehicle to an „AC source or pulsed DC“ as this will lead to component failure.

No liability will be accepted for the use of „LCG“ with non-approved vehicles or lamps.

Aspöck accepts no other terms and installation of our products will be deemed as full acceptance of our terms and conditions.

* LCG 1 - V2 LED-CONTROL-GEAR

GENERAL DESCRIPTION

- This LED control gear adapts the electrical characteristics of LED lights, to fit on trucks, which are not compatible with LEDs until now.
- Compact construction.
- A simple and quick retrofitting in a consisting Aspöck lighting system by the fitting plugs is possible.
- Dimulation of a bulb on the following functions: direction indicator, tail light, brake light.
- Gault detection of the LED direction indicator function.
- **Important: For every LED rear lamp, one LCG is needed (i.e. per vehicle 2 pieces of LCG1).**
- **Attention: The LCG is only compatible with Aspöck LED rear lamps.**

DESCRIPTION

with 7 pin ASS1 and ASS2 connection for Aspöck rear lamps

PART NO

75-0300-107

* please notice the general advice

* LCG 2 - CENTRAL LCG

GENERAL DESCRIPTION

- This LED control gear adapts the electrical characteristics of LED lights, to fit on trucks, which are not compatible with LEDs until now.
- Compact building method (installed at the ASS1 junction box)
- A simple and rapid retrofit into an existing Aspöck lighting system is possible, by the suitable ASS3 plugs.
- Controls only the direction indicator functions (power- and failure -control).
- Current adaptation on the following functions: tail light, brake light, reversing light fog light.
- Cer lightning set is only one LCG 2 needed.
- **Attention: the LCG is only compatible with Aspöck LED rear lamps.**

DESCRIPTION

LCG 2 - standard version
LCG 2 - without direction indicator control

PART NO

75-0310-007

75-0309-007

* LCG 3

GENERAL DESCRIPTION

- This LED control gear adapts the electrical characteristics of LED lights, to fit on trucks, which are not compatible with LEDs until now.
- PERMANENT POWER REQUIRED
 - patented functioning system
 - indicator monitoring ensured
 - no failure messages with onboard computers
 - completely waterproof light system incl. rear lamp possible.
- The LED control gear enables the connection of LED rear lamps to tractor units, even if they are equipped with electronic lamp failure detection systems and onboard computers. Additionally, all light functions are monitored so that any malfunctions that may arise are displayed on the onboard computer.
- **Attention: the LCG is only compatible with Aspöck LED rear lamps**

RDC premium

RDC - PREMIUM

GENERAL DESCRIPTION

- Ramp-distance-control with activation of EBS-modules from various manufacturers.
- This ramp-distance-control is a system by Aspöck to ease the driving to the ramp with trailers, avoiding damages on the vehicle.
- More security for objects and persons behind the vehicle.
- Secure driving on the loading ramp.
- Adjustable ultrasonic sensors.
- Optical (by end outline marker) and acoustic (by the reversing beeper) warning signal.
- Easy installation on the vehicle and easy conversion.
- By engaging the reverse gear twice, the warning signal becomes „night silent“.

RAMP-DISTANCE-CONTROL FOR TRAILER WITH EBS

Driver's sixth sense

Damages occur too frequently while manoeuvring backwards!
RDCpremium, a sixth sense, when combined with trailers EBS systems,
reduces impacts.

24V ELECTRONIC ACCESSORIES

SMCG - SIDE MARKER CONTROL GEAR

GENERAL DESCRIPTION

- This side marker control gear was developed as a solution for the new revision of ECE 48 to Rev. 6. This regulation provides for that after November 2017 by vehicle O3 and O4 all side markers must flash in simultaneously with the direction indicator in the rear lamp.
- Various ways of solution, which avoid the affixing of additional three CAT 5 direction indicators on each side.
- Easy installation on the vehicle and easy conversion.

- **Solution 1: SMCG** - A separate harness which includes a control gear.

DESCRIPTION

SMCG right
SMCG left
SMCG right + left

PART NO

VOLTAGE REDUCER

GENERAL DESCRIPTION

- The voltage reducer was designed for trailers with 12V lamps and a towing vehicle with either 24V or 12V.
- Should a short circuit or overloading occur, the appropriate output switches off. The other outputs remain fully functional.
- The voltage reducer is splash-water and dust-protected and fitted with an automatic voltage recognition (that determines whether the input voltage is 12V or 24V, the output voltage remains a constant 12V).

CONTOUR MARKING TAPE

GENERAL DESCRIPTION

- Unique adhesive layer:
 - Easily and quickly applied without loss of material.
 - The adhesive layer cures into a permanent bond, making the tape repositionable.
- Reflective performance UN/ECE-104 Class C approved:
 - Approved according to european specifications for reflective materials for trucks and trailers.
 - Very high reflective values, especially for larger illumination angles (e.g. 60°).
- Unique prism technology:
 - Layout of the prisms in squares in various orientations.
 - Homogenous horizontal, vertical and diagonal reflection.
- Special composition:
 - Three chemically bound layers making the product thin, flexible and very strong.
 - Impenetrable to water and dirt after cutting or damaging of the product.
 - Contains no air bubbles.
- Acrylate structure:
 - The acrylic top layer offers excellent stability.
 - The structure offers 7 years of proven durability worldwide.

24V Installation Regulations

Legal Installation Regulations for Trailers in Accordance with ECE Regulation No R48

FRONT

1. Front end-outline marker lamp*

Installation:	Mandatory for trailers > 2.1 m wide, Permitted for trailers >1.8 m to < 2.1 m wide.
Number:	2 pieces
Colour:	White
Installation height:	As high as possible.
Spacing:	Mount as far apart as possible to a max. of 400 mm from the furthest point of the vehicle's width.
Geom. angle of visibility:	Horizontally 80° outwards, vertically 5° above and 20° below the horizontal.
Other regulations:	Any front position (side) lamp or reflex reflector may be installed. Additional reflex reflectors are permissible.

*End-outline marker lamps: special regulation for trailers with canopy: On a trailer with a canopy the end-outline marker lamp can only be installed at the bottom. The front white and rear red end-outline marker lamps may be installed in a single lamp provided the installation regulations and angles of visibility are complied with.

O₁ = trailers up to 0.75 t O₂ = trailers from 0.75 t to 3.5 t O₃ = trailers from 3.5 t to 10 t O₄ = trailers over 10 t

2. Front reflex reflector

Installation:	Mandatory for all trailers.
Number:	2 pieces
Colour:	White
Shape:	Not triangular
Installation height:	At least 250 mm, 900 mm max. (exception: 1.500 mm).
Spacing:	There should be a max. of 150 mm and a min. of 600 mm between both reflectors, but at least 400 mm for vehicles with a width of < 1.300 mm.
Geom. angle of visibility:	Horizontally 10° inwards and 30° outwards, vertically ± 10°, but 5° downwards if installation height is < 750 mm.
Other regulations:	The illuminating surface of the reflex reflector may be incorporated in the front position (side) lamp. The installation height of the reflector must be taken into account.

3. Front position (side) lamp

Installation:	Mandatory for trailers > 1.6 m wide, permitted for trailers ≤ 1.6 m wide.
Number:	2 pieces
Colour:	white
Installation height:	At least 350 mm, 1.500 mm max. (exception: 2,100 mm on trailers of the categories O1 and O2 only or on other trailers where a max. of 1.500 mm is not possible).
Spacing:	A max. of 150 mm from the furthest point of the vehicle's width, with a min. of 600 mm between both front position lamps, but of at least 400 mm on vehicles with a width of < 1.300 mm.
Geom. angle of visibility:	Horizontally 5° inwards and 80° outwards. Vertically ± 15°, but also 5° downward if installation height is < 750 mm.
Other regulations:	The illuminating surface of the reflex reflector may be incorporated in the front position (side) lamp. The installation height of the reflector must be taken into account.

SIDE

4. Side reflex reflector

Installation:	Mandatory for all trailers.
Number:	At least one in the middle third.
Colour:	Yellow
Installation height:	At least 250 mm, 900 mm max. (exception: 1.500 mm).
Spacing:	No more than 3 m from front (including drawbar); no more than 1 m from rear, no more than 3 m between each reflector (exception: 4 m).
Geom. angle of visibility:	Horizontally ± 45°, vertically ± 10°, but 5° downwards if installation height is < 750 mm.
Other regulations:	The illuminating surface of the reflex reflector may be incorporated in the side-marker lamp. The max. installation height of the reflector must be taken into account.

5. Side-marker lamp

Installation:	Mandatory for trailers > 6 m long, permitted for trailers < 6 m long.
Number:	At least one in the middle third.
Colour:	Yellow in front, yellow at rear (red also possible in combination with the rear light).
Installation height:	No more than 3 m from front (including drawbar), no more than 1 m from rear, no more than 3 m between each side-marker lamp (exception: 4 m).
Geom. angle of visibility:	Horizontally $\pm 45^\circ$, vertically $\pm 10^\circ$, but 5° downwards if installation height is < 750 mm .
Other regulations:	The illuminating surface of the reflex reflector may be incorporated in the side-marker lamp. The max. installation height of the reflector must be taken into account.

Note: side-marker lamp: intensity of light emitted at least 4cd = for trailers of every category

REAR

6. Direction indicator lamps

Installation:	Mandatory for all trailers, category 2a or 2b.
Number:	2 pieces
Colour:	Yellow
Installation height:	At least 350 mm, 1.500 mm max. (exception: 2.100 mm only if no two additional direction indicator lamps have been installed). Installation height of additional direction indicator lamps: at least 600 mm above the mandatory direction indicator lamps.
Spacing:	No more than 400 mm from the furthest point of the vehicle's width. This does not apply to the additional direction indicator lamps. There should be at least 600 mm between the two direction indicator lamps, but at least 400 mm on vehicles < 1.300 mm wide.
Geom. angle of visibility:	Horizontally 45° inwards to 80° outwards, vertically $\pm 15^\circ$, but also 5° downwards if installation height is < 750 mm.
Other regulations:	Installation of two additional direction indicator lamps (2a or 2b) is permitted on all trailers in the categories O_2 , O_3 and O_4 .

7. Rear tail lamp

Installation:	Mandatory for all trailers.
Number:	2 pieces
Colour:	Red
Installation height:	At least 350 mm, 1.500 mm max. (exception: 2.100 mm only if no two additional rear lamps have been installed). Installation height of the additional rear lamps: at least 600 mm above the mandatory rear lamps.
Spacing:	A max. of 400 mm from the furthest point of the vehicle's width. This does not apply to the additional rear lamps. There must be at least 600 mm between the two rear lamps, but at least 400 mm if the vehicle is < 1.300 mm wide.
Geom. angle of visibility:	Horizontally 45° inwards to 80° outwards, vertically $\pm 15^\circ$, but also 5° downwards if installation height is < 750 mm.
Other regulations:	Unless end-outline marker lamps are installed, two additional rear end-outline lamps may be installed on all trailers of the categories O_2 , O_3 and O_4 .

8. Stop lamp

Installation:	Mandatory for all trailers, category S1 or S2.
Number:	2 pieces. Unless category S3, S4 stop lamps have been installed, two additional stop lamps of the category S1 or S2 may be installed on vehicles of the categories O ₂ , O ₃ and O ₄ .
Colour:	Red
Installation height:	At least 350 mm, 1.500 mm max. (exception: 2.100 mm only if no two additional stop lamps have been installed). Installation height of the additional stop lamps: at least 600 mm above the mandatory stop lamps.
Spacing:	On all trailers at least 600 mm between the two stop lamps, but at least 400 mm if the vehicle is < 1.300 mm wide.
Geom. angle of visibility:	Horizontally ± 45°, vertically ± 15°, but also 5° downwards if the installation height is < 750 mm.
Other regulations:	The distance between the S1 or S2 stop lamp and the rear fog lamp must be > 100 mm.

9. Reversing light

Installation:	Mandatory for all trailers of vehicle categories O ₂ , O ₃ and O ₄ , permissible for trailers of vehicle category O ₁
Number:	1 piece light is mandatory, a second permissible on trailers < 6 m long. 2 lights mandatory on vehicles > 6 m long, and 2 additional reversing lights permissible on all other trailers.
Colour:	White
Installation height:	At least 250 mm, 1.200 mm max.
Spacing:	No regulations apply
Geom. angle of visibility:	1 light: horizontally ± 45°. 2 lights: horizontally 30° inwards to 45° outwards. Vertically 15° upwards to 5° downwards.
Other regulations:	Installation of additional reversing lights on the vehicle is possible at the rear or on the sides.

10. Rear fog lamp

Installation:	Mandatory for all trailers.
Number:	1 piece or 2 pieces
Colour:	Red
Installation height:	At least 250 mm, 1.000 mm max.
Spacing:	No regulations apply.
General regulations for installation:	In the case of 1 rear fog lamp: left of centre for left-hand drive vehicles, right of centre for right-hand drive vehicles. Centre installation permissible.
Geom. angle of visibility:	Horizontally ± 25°, vertically ± 5°.
Circuit-closed tell-tale:	Mandatory. An independent, non-flashing tell-tale.
Other regulations:	Distance from the stop lamp must be > 100 mm.

11. End-outline marker lamp *

Installation:	Mandatory for trailers > 2.1 m wide. Permissible for trailers > 1.8 m to 2.1 m wide.
Number:	2 pieces statutory, 2 optional
Colour:	Red
Installation height:	As high as possible.
Spacing:	As near the widest point of the vehicle as possible, a max. of 400 mm from the furthest point of the vehicle's width.
Geom. angle of visibility:	Horizontally 80° outwards. Vertically 5° above and 20° below the horizontal.
Other regulations:	The rear red and front white end-outline marker lamps may be installed in a single lamp provided the installation regulations and angles of visibility are complied with. The distance between the end-outline marker lamp and the rear lamp must be at least 200 mm. Any rear light or rear reflex reflector may be used. Additional reflectors are permitted.

*End-outline marker lamps: special regulation for trailers with canopy:

On a trailer with a canopy the end-outline marker lamp can only be installed at the bottom. The front white and rear red end-outline marker lamps may be installed in a single lamp provided the installation regulations and angles of visibility are complied with.

12. Rear reflex reflector

Installation:	Mandatory for all trailers.
Number:	2 pieces
Colour:	Red
Shape:	Triangular
Alignment:	The tip of the triangle must point upwards.
Installation height:	At least 250 mm, 900 mm max. (exception: 1.500 mm).
Spacing:	No more than 400 mm from the furthest point of the vehicle's width, with at least 600 mm between both reflectors, but at least 400 mm if the vehicle is < 1.300 mm wide.
Geom. angle of visibility:	Horizontally ± 30°. Vertically ± 15°, but 5° downwards if the installation height is < 750 mm.
Other regulations:	A rear light with an incorporated rectangular reflex reflector is permitted on trailers. Additional reflex reflectors are permitted.

13. Registration plate lamp

Installation:	Mandatory for all trailers.
Number:	1 piece or more
Colour:	White
Installation height:	at least 350 mm to bottom edge triangle, max. 900 mm to top triangle (exception: 1.500 mm)
Position:	Central or on the left (or right on right-hand drive vehicles).

14. High-mounted stop lamp

Installation:	Permitted on all trailers, category S3.
Number:	1 piece If the vehicle's median longitudinal plane does not pass through a solid rear panel but is, for instance, divided by doors leaving no room for an S3 stop lamp, it is permissible for two S3 stop lamps of the stop lamp type „D“ or for one S3 stop lamp to be installed to the left or the right of the vehicle's median longitudinal plane.
Colour:	Red
Installation height:	At least 350 mm, 1.500 mm max. (exception: 2.100 mm only if no two additional rear lamps have been installed). Installation height of the additional rear lamps: at least 600 mm above the mandatory rear lamps.
Spacing:	The point of reference must be the in the trailer's median longitudinal plane. If two S3 stop lamps have been installed each one must be installed as near as possible to the median longitudinal plane. If only one S3 stop lamp is installed next to the median longitudinal plane the distance must be no greater 150 mm.
Geom. angle of visibility:	Horizontally $\pm 10^\circ$ Vertically 10° above and 5° below the horizontal.
