WHY GREASING YOUR TRUCK'S FIFTH WHEEL IS CRITICAL FOR ROAD SAFETY

When was the last time you gave your truck's fifth wheel the attention it needs? And are you aware of the direct link between fifth wheel greasing and road safety?

Not greasing enough, using low-quality grease or over-greasing can all compromise road safety. This is due to:

1

Reduced maneuverability from high friction.

2

An increased risk of trailer drop caused by fifth wheel failure.

3

Grease spillage on the road - a danger to traffic and the environment.

These issues can lead to severe accidents, putting both your own safety and the safety of others at risk.

But greasing the fifth wheel can quickly become a messy and unpleasant task. This is especially true without the proper tools, or if you need to deal with a grease that is too stiff or too fluent after being left in dirty, smelly and bulky grease containers outside of your cabin.

So, how can you keep yourself and your vehicle safe, while also avoiding the hassle that re-greasing your fifth wheel often involves?

Shell Gadus Fifth Wheel Grease is an easy-to-apply and easy-to-store high quality grease that has been specifically designed for use on the truck's fifth wheel.

The grease has superior load-carrying capabilities due to its solid lubricant particles, making it the right choice for this heavy and shock-loaded application; while superior adhesion properties protect it from water spray-off and make it stay on the fifth wheel surface for longer, providing effective greasing and corrosion protection.*

Developed with safety and convenience in mind - and thanks to its purpose-designed applicator tube - it allows you to apply just the right amount of this high quality, dedicated fifth wheel grease without needing any additional tools or requiring you to get your hands dirty. When you're done, simply reseal and store it in your cabin: no mess, no smell, no grease hardening or softening.

Find out how Shell Gadus Fifth Wheel Grease can cut out the hassle currently involved in greasing your fifth wheel - no mess, no fuss and keeping you safe on the road in the process.
